EDUCATION

University of Texas at Dallas

Richardson, TX

Bachelor of Science in Computer Science

Expected Dec. 2026

- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Advanced Algorithm Design, Database Systems, Software Engineering, Programming Language Paradigms, Systems Programming, Probability & Statistics, Linear Algebra.

EXPERIENCE

Nokia

Dallas, TX

AI Software Automation Co-op

May 2026 – Present

- Evaluate **LLM-powered** network automation workflows, validating **model accuracy**, source grounding, and response reliability across **AI-assisted knowledge search** and network query use cases.
- Refine **domain-specific AI datasets** and **feedback pipelines**, reviewing technical query-response pairs to improve retrieval quality and strengthen knowledge-search grounding alongside **R&D**.
- Identify AI behavior and usability gaps, then define **solution requirements** and repeatable validation methods that support **PoC development** and release-readiness decisions across product teams.

Mashfrog

Remote

Software Engineering Intern

May 2025 – Aug. 2025

- Designed, tested, and deployed **RPA** and **generative AI** workflows that automated business processes, reduced manual effort, and improved exception handling.
- Built custom UI components in **Angular** and **TypeScript**, integrating frontend workflows with **REST APIs**, internal systems, and automation pipelines for full-cycle delivery.

Kumon

Roanoke, TX

Assistant Manager

Feb. 2024 – Sept. 2024

- Managed scheduling, enrollment, invoicing, and local marketing for **50+** students weekly, helping grow enrollment by **30%**.

PROJECTS

VisionTranslate | *Chrome MV3, React, JavaScript, OCR, LLMs*

Apr. 2026 – Present

- Built a **Chrome MV3** extension that detects images, canvases, and background images on any webpage, runs **OCR**, and renders layout-aware translated overlays in place.
- Engineered an end-to-end pipeline across content scripts, background services, image processing, **LLM-backed translation**, caching, and read-aloud support for low-latency translations.

ToyotaTinder: AI Car Matchmaker | *Next.js, React, Node.js, Google Gemini*

Nov. 2025

- Built a **Next.js** App Router web app for **HackUTD 2025** pairing Toyota inventory data with **Google Gemini 2.5 Flash** to generate personalized car recommendations.
- Implemented server-side filtering, scoring, robust **JSON parsing**, and fallback handling to keep AI recommendations reliable under malformed model output.

CometPark: UTD Parking Solution | *Remix, TypeScript, MongoDB, Pinata*

Nov. 2024

- Built a full-stack **Remix** and **TypeScript** app that crowdsources UTD parking lot ratings through user image uploads stored on **Pinata IPFS**.
- Built a real-time analytics dashboard with **WebSockets** and optimized **MongoDB** queries for **10,000+** user interactions.

TECHNICAL SKILLS

- **Languages:** Python, Java, C++, JavaScript, TypeScript, SQL, HTML/CSS
- **AI/ML:** LLM Evaluation, RAG & Knowledge Search, Prompt Engineering, Model Reliability Testing, Dataset Refinement, OCR Pipelines, TensorFlow, Google Gemini
- **Software:** React, Next.js, Angular, Node.js, FastAPI, REST APIs, MongoDB, Git
- **Cloud & Automation:** AWS Lambda, AWS S3, Google Cloud Vision, RPA, API Integration
- **Certifications:** AWS Certified Cloud Practitioner, Databricks Fundamentals Accreditation
