EDUCATION

University of Texas at Dallas
Bachelor of Science in Computer Science

Richardson, TX
Dec. 2026

EXPERIENCE

AI Software Automation Co-op | *Nokia, Dallas, TX* **May 2026 – Aug. 2026**
– Testing and evaluating multiple **AI models** and model-powered product use cases, validating behavior, reliability, usability, and alignment with release requirements.
– Collaborating with **R&D** teams to assess AI system outputs, identify model performance gaps, and provide technical feedback supporting release-readiness decisions.
– Researching AI model testing patterns, use case validation methods, and automation strategies for intelligent product workflows.

Software Engineering Intern | *Mashfrog (Remote)* **May 2025 – Aug. 2025**
– Designed, tested, and deployed **RPA** and **Gen AI** workflow solutions to automate business processes, reduce manual effort, and improve exception handling.
– Built custom UI components with **Angular** and **TypeScript**, integrating frontend workflows with APIs, internal systems, and automation pipelines.
– Collaborated with technical and business teams to gather requirements, configure modules, troubleshoot issues, and support full-cycle software delivery.

Assistant Manager | *Kumon, Roanoke, TX* **Feb. 2024 – Sept. 2024**
– Managed enrollment, scheduling, parent communication, invoicing, and local marketing for **50+** students weekly, helping increase enrollments by **30%**.

PROJECTS

VisionTranslate | *Chrome MV3, React, JavaScript, OCR, LLMs* **Apr. 2026 – Present**
– Built a **Chrome MV3** AI translation extension that detects webpage images, canvases, and background images, applies **OCR**, and reconstructs translated overlays.
– Designed an end-to-end AI pipeline across content scripts, background services, image processing, **LLM-backed translation**, caching, layout-aware rendering, and read-aloud support.

ToyotaTinder: AI Car Matchmaker | *Next.js, React, Node.js, Google Gemini* **Nov. 2025**
– Built ToyotaTinder for **HackUTD 2025**, a Next.js App Router web app using Toyota inventory data and **Google Gemini 2.5 Flash** for personalized car recommendations.
– Developed server-side filtering, scoring, robust JSON parsing, lightweight auth, liked-car storage, and fallback handling to keep AI recommendations reliable.

CometPark: UTD Parking Solution | *Remix, TypeScript, MongoDB, Pinata* **Nov. 2024**
– Designed a full-stack web app to track UTD parking lot ratings through user image uploads stored with **Pinata** IPFS.
– Built a real-time analytics dashboard with **WebSockets** and optimized **MongoDB** queries to handle **10,000+** user interactions efficiently.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, JavaScript, TypeScript, HTML, CSS, SQL
- **AI/ML:** Machine Learning Fundamentals, LLM Integration, Model Evaluation, Prompt Engineering, OCR Pipelines, AI Use Case Testing
- **Frameworks and Tools:** React, Next.js, Angular, Node.js, FastAPI, Remix, MongoDB, TensorFlow, Git, LaTeX
- **Automation and Cloud:** RPA, Google Gemini, Google Cloud Vision, ElevenLabs, AWS Lambda, AWS S3, API Integration
- **Certifications:** AWS Certified Cloud Practitioner; Databricks Fundamentals Accreditation
