EDUCATION

University of Texas at Dallas

Bachelor of Science in Computer Science

Richardson, TX

Expected Dec. 2026

- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Data Structures, Advanced Algorithms, Database Systems, Software Engineering, Probability & Statistics, Operating Systems, Computer Networks

EXPERIENCE

Nokia

AI Software Automation Co-op

Dallas, TX

May 2026 – Aug. 2026

- Built **LLM evaluation suites** with **1000+** tests to assess response quality, reliability, and safety, designing baseline scoring to support regression testing and model upgrades.
- Proposed and prototyped a **skills-based AI planning framework**, collaborating with R&D to define technical requirements for future network-automation capabilities.
- Evaluated an **LLM/RAG** network-management assistant across **100+** use cases, translating findings into **20+** defect tickets and **50+** product improvement proposals.
- Investigated recurring failures in **AI planning workflows**, comparing model responses with expected system behavior and performing **root-cause analysis** to help R&D prioritize high-impact fixes.

Mashfrog

Software Engineering Intern

Remote

May 2025 – Aug. 2025

- Developed and validated an automation bot, achieving **98%** accuracy across **2,000+** test cases while reducing manual errors and strengthening exception handling.
- Designed, tested, and deployed **20+ RPA** and **generative AI** workflows that automated core business processes, saving over **30 hours** of manual effort weekly and accelerating task completion by up to **400%**.

PROJECTS AND RESEARCH

HaltIQ | *Undergraduate Researcher, ACM Research*

Fall 2026

- Developing **reinforcement learning** policies using **GRPO** and potential-based reward shaping to learn when **multi-agent LLM systems** should stop delegating, targeting lower inference costs while preserving answer quality.
- Designing **HotpotQA** experiments with selective **LLM-as-judge** evaluation and **cached trajectory replay** to benchmark adaptive stopping against fixed-round and semantic-convergence baselines.

UTD Clubs | *Software Engineer, Nebula Labs*

Sept. 2026 – Present

- Develop and maintain a full-stack campus platform for **club discovery**, **event registration**, and organization management using **Next.js**, **React**, and **TypeScript**.
- Implement features and resolve bugs across interactive interfaces, type-safe **tRPC APIs**, and **PostgreSQL** data workflows with **Drizzle ORM**.

VisionTranslate | *Chrome MV3, React, JavaScript, OCR, LLMs*

Apr. 2026 – Present

- Developed a **Chrome MV3** extension that detects images, canvases, and background images on any webpage, runs **OCR**, and renders layout-aware translated overlays in place.
- Engineered the end-to-end **OCR-to-LLM** translation pipeline with caching for low-latency overlays.

ToyotaTinder: AI Car Matchmaker | *Next.js, React, Node.js, Google Gemini*

Nov. 2025

- Built a **Next.js** App Router web app for **HackUTD 2025** pairing **Toyota inventory data** with **Google Gemini 2.5 Flash** to generate personalized car recommendations.
- Implemented server-side filtering, scoring, robust **JSON parsing**, and fallback handling to keep AI recommendations reliable under malformed model output.

TECHNICAL SKILLS

- **Languages:** Python, Java, C++, JavaScript, TypeScript, SQL
- **AI & Security Testing:** Adversarial & Safety Testing, Prompt-Injection Test Design, Fault-Injection (Known-Answer) Test Design, LLM/RAG Evaluation, Baseline Regression Scoring, Test Coverage & Traceability
- **Networking:** REST APIs, WebSockets, Fault & Alarm Analysis, Optical Transport Exposure (DWDM, OTN)
- **Tools & Cloud:** Linux/UNIX, Git, Node.js, FastAPI, MongoDB, RPA, AWS Lambda, AWS S3
- **Certifications:** AWS Certified Cloud Practitioner, Databricks Fundamentals Accreditation
