EDUCATION

University of Texas at Dallas

Richardson, TX

Bachelor of Science in Computer Science

Expected Dec. 2026

- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Advanced Algorithm Design, Database Systems, Software Engineering, Probability & Statistics, Linear Algebra.

EXPERIENCE

Nokia

Dallas, TX

AI Software Automation Co-op

May 2026 – Aug. 2026

- Evaluated an **LLM/RAG assistant** embedded in Nokia's optical network-management platform across **100+** use cases, authoring the release feedback report for **R&D** with **20+** evidence-backed defect tickets and **50+** roadmap proposals.
- Ran systematic evaluations of an **LLM-based planning assistant** against ground-truth system behavior, tracing most failures to a single **root cause** and pinpointing the highest-impact fix for R&D.
- Built **LLM evaluation** suites (**1000+** tests) covering regression, instruction adherence, **retrieval grounding**, and **adversarial safety**, with baseline-comparison scoring designed to measure the impact of a model upgrade.
- Proposed a **Skills-based** approach for a new AI planning framework, then created a **proof of concept** and co-developed the **solution requirements** specification guiding future versions of the product.

Mashfrog

Remote

Software Engineering Intern

May 2025 – Aug. 2025

- Designed, tested, and deployed **20+ RPA** and **generative AI** workflows that automated core business processes, saving over **30 hours** of manual effort weekly and accelerating task completion by up to **400%**.
- Developed and validated an automation bot, achieving **98%** accuracy across **2,000+** test cases while reducing manual errors and strengthening exception handling.
- Built custom **Angular** and **TypeScript** UI components delivered to **5+** customers and adopted by over **100** workers.

PROJECTS

VisionTranslate | *Chrome MV3, React, JavaScript, OCR, LLMs*

Apr. 2026 – Present

- Developed a **Chrome MV3** extension that detects images, canvases, and background images on any webpage, runs **OCR**, and renders layout-aware translated overlays in place.
- Engineered an end-to-end pipeline across content scripts, background services, image processing, **LLM-backed translation**, caching, and read-aloud support for low-latency translations.

ToyotaTinder: AI Car Matchmaker | *Next.js, React, Node.js, Google Gemini*

Nov. 2025

- Built a **Next.js** App Router web app for **HackUTD 2025** pairing Toyota inventory data with **Google Gemini 2.5 Flash** to generate personalized car recommendations.
- Implemented server-side filtering, scoring, robust **JSON parsing**, and fallback handling to keep AI recommendations reliable under malformed model output.

CometPark: UTD Parking Solution | *Remix, TypeScript, MongoDB, Pinata*

Nov. 2024

- Created a full-stack **Remix** and **TypeScript** app that crowdsources UTD parking lot ratings through user image uploads stored on **Pinata IPFS**.
- Architected a real-time analytics dashboard with **WebSockets** and optimized **MongoDB** queries for **10,000+** user interactions.

TECHNICAL SKILLS

- **Languages:** Python, Java, C++, JavaScript, TypeScript, SQL, HTML/CSS
- **AI/ML:** LLM Evaluation, RAG & Retrieval Validation, Adversarial & Safety Testing, Prompt Engineering, Regression Test Design, Root-Cause Analysis, Dataset Refinement, Generative AI, OCR Pipelines, TensorFlow, Google Gemini
- **Software:** React, Next.js, Remix, Angular, Node.js, FastAPI, REST APIs, WebSockets, MongoDB, Git, Linux
- **Cloud & Automation:** AWS Lambda, AWS S3, Google Cloud Vision, RPA, API Integration
- **Certifications:** AWS Certified Cloud Practitioner, Databricks Fundamentals Accreditation
