EDUCATION

University of Texas at Dallas

Richardson, TX

Bachelor of Science in Computer Science

Dec. 2026

Relevant Coursework: **Data Structures, Systems Programming, Intro to Machine Learning, OS Concepts, Computer Architecture**

EXPERIENCE

AI Software Automation Co-op | *Nokia, Dallas, TX*

May 2026 – Aug. 2026

- Selected to develop **AI-focused software automation** solutions for fiber optic workflows, reducing manual setup complexity and improving operational tool efficiency.
- Expected to support research, prototyping, and lab experimentation for intelligent fiber optic automation workflows with emphasis on reliability, usability, and process improvement.

Software Engineering Intern | *Mashfrog (Remote)*

May 2025 – Aug. 2025

- Automated business processes by designing, testing, and deploying **RPA** and **Gen AI** workflow solutions to improve efficiency and exception handling.
- Developed custom UI components with **Angular** and **TypeScript** while configuring integrations and API endpoints across internal systems.
- Supported full-cycle software delivery by gathering requirements, customizing modules, and assisting deployment efforts across teams.

Assistant Manager | *Kumon, Roanoke, TX*

Feb. 2024 – Sept. 2024

- Managed enrollment, scheduling, parent communication, invoicing, and local marketing for **50+** students weekly, helping increase enrollments by **30%**.

PROJECTS

VisionTranslate | *Chrome MV3, React, JavaScript*

Apr. 2026 – Present

- Built a **Chrome MV3** image translation extension that detects webpage images, canvases, and background images, applies **OCR**, and reconstructs translated overlays on the original image.
- Designed an end-to-end pipeline across content scripts, background services, image processing, **LLM-backed translation**, caching, layout-aware rendering, and read-aloud support.

ToyotaTinder: AI Car Matchmaker | *Next.js, React, Node.js, Google Gemini*

Nov. 2025

- Built ToyotaTinder for **HackUTD 2025**, a Next.js App Router web app that turns Toyota inventory data and **Google Gemini 2.5 Flash** into swipe-style car recommendations.
- Added server-side filtering, scoring, robust JSON parsing, lightweight auth, liked-car storage, and fallback handling to keep demos reliable without an API key.

CometPark: UTD Parking Solution | *Remix, TypeScript, Pinata*

Nov. 2024

- Designed a full-stack web app to track UTD parking lot ratings through user image uploads stored with **Pinata** IPFS.
- Built a real-time analytics dashboard with **WebSockets** and optimized **MongoDB** queries to handle **10,000+** user interactions efficiently.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, JavaScript, TypeScript, HTML, CSS, SQL
- **Frameworks and Tools:** React, Next.js, Angular, Node.js, FastAPI, Remix, MongoDB, TensorFlow, Git, LaTeX
- **AI, Automation, and Cloud:** Google Gemini, Google Cloud Vision, ElevenLabs, OCR pipelines, LLM-backed translation, AWS Lambda, AWS S3
- **Certifications:** AWS Certified Cloud Practitioner; Databricks Fundamentals Accreditation
